Pikes Peak State College, December 2022

Cumulative GPA: 3.5

Skills / Attributes

- Secret Clearance
- Security+
- Linux+ (In Progress)
- Cisco Networking
- Virtualization
- Teamwork / Communication
- Microsoft Word
- Microsoft Excel

Experience

SECURITY CONTROLLER • CHENEGA • 4/2023 – CURRENT

I am currently a Security Controller for Chenega Infinity, working in the SOC for the MDA on Schriever SFB. My duties at work are varied, but revolve around ensuring the security of controlled rooms within the building using OnGuard IDS. On occasion, I also man the front desk, resolving issues people may have, and giving temporary badges to people when needed.

Recently I also was selected by my company to do security for the 2023 Multi National Missile Defense Conference in Hawaii. The event lasted 3 days, and my team ensured that no unauthorized items were allowed into the event. In addition to this, we helped set up, and tear down the equipment we used during the event.

NEUROFEEDBACK TECH • NEUROHOPE LLC • 12/2022 - 5/2023

During my time as a neurofeedback technician I administered care to patients I was assigned, based on the protocol decided by the doctor they were seeing. While conducting my work, I needed to comply with many regulations, the biggest being HIPPA. I used Microsoft Word and Excel every day, and was very comfortable using them to communicate with the rest of the team.

LIFEGUARD • YMCA • 4/2021 - 9/2022

While working as a lifeguard, I did many things, not just stare at the pool. I also handled chemical levels, assist the front desk, and if needed, ensured medical care could be given properly, and in a timely manor. I worked at several locations, and learned the proper procedures for each to ensure our patrons safety.

CUSTOMER SERVICE • BEST BUY • 8/2019 - 11/2020

While employed at Best Buy I handled all customer service tasks. This consisted of managing online orders, returning products, ordering items required by the store, and helping out in other departments as needed. In addition, I spent a good amount of time in the warehouse, assisting our staff with the inventory system, and truck orders.
